1. Importing Demo Content

Once you have installed the theme, you may want to take the theme for a test drive in order to see how a full fledged website would look like. You can do this by importing demo content that is provided with eCommerce Gem Plus. Please follow the steps below:
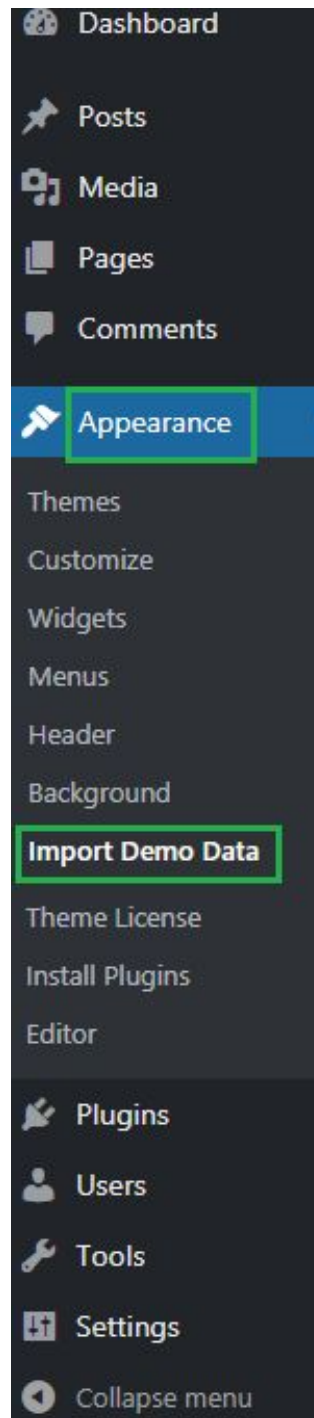

- In your WordPress admin, go to *Appearance > About eCommerce Gem > Recommended Actions* and click on "Install" below "One Click Demo Import" title
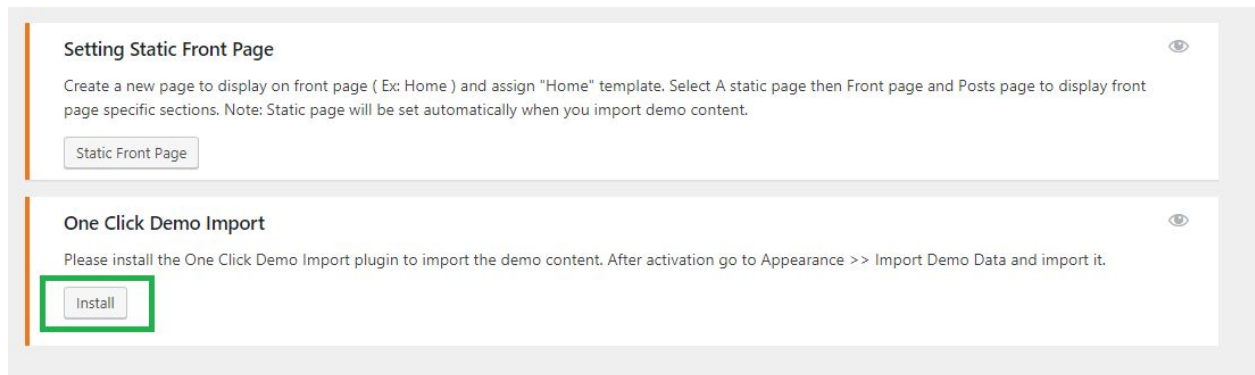

o   Click on "Activate", the button that appears after installing the plug-in

----
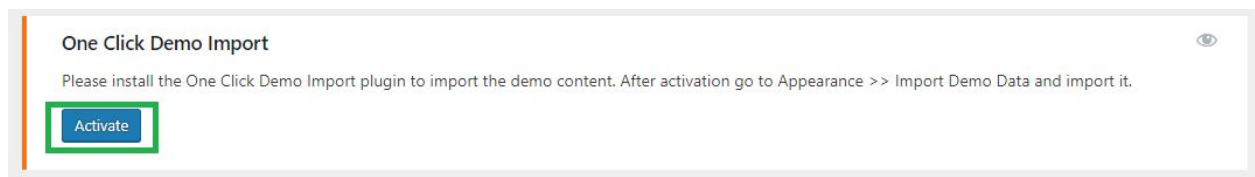

● Go to *Appearance > Import Demo Data*

● Click on "Import Demo Data"

When you import the data, the following things might happen:

▪ No existing posts, pages, categories, images, custom post types or any other data will be deleted or modified.
▪ Posts, pages, images, widgets, menus and other theme settings will get imported.
▪ Please click on the Import button only once and wait, it can take a couple of minutes.

Import Demo Data

● This may take a few minutes, so do not refresh the page until the process is complete

Once this completes, you shall have a website that looks complete with all layouts and styles visible for you to review and plan how they can be used.

Want help for something else? Please go through Theme Documentation or Contact us, we will be glad to answer you.
